For Your Files

This list may not reach you at planting time so we ask you to file it for future wants.

HUNTINGTON'S

LIST OF BEST KNOWN AND MOST USEFUL

SEEDS *of* PERENNIAL *and* BIENNIAL PLANTS

As varieties and prices of these items seldom change we will not send this to you each season. Subject to crop failure we will be able to fill any item offered as long as we are in business. Note that no five cent packets are offered. Each packet contains ten cents' worth of seeds, clean, fresh, and true to name.

RALPH E. HUNTINGTON
PAINESVILLE, OHIO, U. S. A.

To the Buyer

In presenting this list of seeds, I have made no attempt at beauty. My whole effort has been to place before you the best and widest possible list of really good, fresh, and true seeds. By offering them in this manner, I am able to price them as low as seeds of like quality can be handled. Last season we could hardly keep up with our orders by working nights, and it is very gratifying to note that though we received many complimentary letters as to the quality of our seeds, only one lone buyer registered a failure, of the hundreds or orders sent out.

ORDERING.

The highest grade annual seeds offered by the best houses, come from very much the same sources, wherever you buy them, and comparatively near by, hence it is an easy matter to keep in touch with the crops and to avoid listing crop failures. On the other hand, very much so, the seeds in this list come from all over the world. It is absolutely impossible for us to learn of crop failures of many items until long after the printer has our catalogue finished. If the buyer, in placing an order, will name one or two second choice items it will be of great help to us, and will insure 100% delivery.

GERMINATION

I do not guarantee germination, either in frames or outside, but I do guarantee at least 90% in an approved test. So many causes may contribute to failure that a guarantee of germination is impossible. Condensed directions for growing are sent out with each order.

QUANTITIES

Except in new or very scarce items, each packet will contain from one to five hundred seeds, according to value per ounce. Trade packets will contain at least three times the quantities of the packets, and in most cases 1000 seeds. Many new and scarce items are bought by the thousand seeds instead of by weight. Some costing us as high as \$8 per 100, and these are priced accordingly.

Jobbers or growers please write for ounce or pound prices on your wants.

--	-----	-----

HOLLYHOCK—Double Exquisite mixed. The flowers of this splendid new strain are very large, with closely set, long spikes. Every petal, both edge and centre, is curled and fringed to an extent that immediately attracts attention. Flowers are extremely double, and as high built as a double petunia. Each white margined petal is spotted with a large "pelargonium" blotch, making this new item a very distinct novelty. There are as yet no strong reds in the mixture, including only rose, light rose, carmine, violet and purple— .25 .70

* HYACINTHUS CANDICANS , (Cape Hyacinth) Tall white—	.10	.25
IBERIS , (Hardy Candytuft) Sempervirens , Pure White—	.10	.25
